**Current priorities and strategies for producing sustainable urban landscapes in street hierarchies, connections and places.**

The future of urban cities and towns will be influenced by the ability of communities to develop meaningful planning and design strategies founded on the interplay of viable priorities and opportunities. Numerous priorities have been articulated by communities, including specific outcomes that address the broader vision for livable urban contexts. All are envisioned as opportunities for effective planning and design outcomes within urban landscape contexts. *Urban Landscape Priorities, Opportunities and Prospect* presents current priorities and strategies for producing sustainable urban landscapes in street hierarchies, connections and places.

### Key selling points

- The text is applicable to both academic and professional contexts
- Key themes address urban livability, access and sustainability
- Presents priorities and opportunities as urban landscape influences in multiple urban contexts
- A prime factor in the role prospect is the issue of livability and climate change
