Description

Written by one of Italy's leading historians, this book analyses the Neapolitan nobleman Gaetano Filangieri and his seven-volume *Science of Legislation* in their historical context.

'Essential reading for anyone interested in the European Enlightenment or the revolutionary movements of the eighteenth century.' —*Lynn Hunt, Eugen Weber Professor of Modern European History, UCLA*

Written by one of Italy's leading historians, this book analyses the context and legacy of Gaetano Filangieri's seven-volume 'Science of Legislation'. This study engages with the unique history of Enlightenment Naples, the intellectual traditions upon which Filangieri drew, and the powerful repercussions of the American Revolution in eighteenth-century Italy to re-draw the map of Enlightenment republicanism and the early history of human rights and their political economy.

Readership: This book will be of interest to historians of the Enlightenment, historians of political thought, legal historians, and historians of Italy in the English-speaking world; it will also appeal to economists, historians of economic analysis, and historians interested in the history of political economy and of Enlightenment reformism.
