A comparative analysis of the capital account liberalization process.

"Emerging Market Economies and Financial Globalization" offers a comparative analysis of the capital account liberalization process and the variety of policy responses generated among a reduced group of Latin American and Asian countries. In particular, the book proposes to critically examine these varied responses from a three-fold perspective: macro, micro-financial and institutional.

Readership

"Emerging Market Economies and Financial Globalization" is aimed at researchers and students of financial crises and emerging markets economies from a variety of academic domains: political economists, macroeconomist and comparative institutional politics. The book will also be of interest to the financial media and regulators interested in cross-country analysis.
