#### Detailed analysis of reef management and outcomes in Indonesia and Malaysia.

“In *Managing Coral Reefs*, Dunning has taken on one of the most difficult problems in marine policy—that of comparing the effectiveness of top down versus bottom-up institutions for conserving biological diversity. [...] A range of specific policy recommendations makes this work essential for both the practitioner and the stakeholder.”

—Porter Hoagland, Senior Research Specialist, Marine Policy Center, Woods Hole Oceanographic Institution, USA

“This timely book [...] is a worthwhile contribution to the growing literature on marine protected areas, conservation and management.”

—Lyndon DeVantier, coral reef ecologist

‘*Managing Coral Reefs*’ compares reef management in Indonesia, which takes a decentralized approach, and in Malaysia, which takes a centralized approach.
