Insights in processes of innovation and learning by a world's leading expert on management and development

'Presented as a journey in the process of understanding innovation systems and the learning economy, this book is a major shift in economic perspective and provides a roadmap for designing a better future. Indispensable for social scientists and politicians, teachers and students, policy makers and all interested citizens in these uncertain times.'

—Carlota Perez, Professor, London School of Economics and University of Sussex, UK, and Nurkse School, Estoni

'This is a compelling book and an exciting read for all those interested in innovation as an interactive process. It brings together more than thirty years of seminal and insightful research on learning, the learning economy and national innovation systems by the leading figure in innovation systems.'

—Franco Malerba, Professor of Applied Economics, Bocconi University, Italy

'The Learning Economy and the Economics of Hope' offers original insights in processes of innovation and learning and draws implications for economic theory and public policy. The book introduces the reader to important concepts such as innovation systems and the learning economy. It throws new light on economic development and opens up horizons for a new kind of economics – the economics of hope.
