BISAC CODE: POL011010

BIC CODE: JPSD

Extent: 292 pages

Size: 153 x 229 mm /

6 x 9 inches

RIGHTS

Exclusive: WORLD

'Complexity of Transboundary Water Conflicts' seeks to understand transboundary water issues as complex systems with contingent conditions and possibilities. To address those conditions and leverage the possibilities it introduces the concept of enabling conditions as a pragmatic way to identify and act on the emergent possibilities to resolve transboundary water issues.

Key selling points

- Provides a new framework based on the relationship between complexity and contingency to understand, explain and address transboundary water issues
- Extends complexity science to transboundary water management both in terms of theory and case analysis
- Studies the development and extension of enabling conditions to understand the causal explanation of complex conditions
- Balances conceptual and case analysis to bridge the theory-reality gap
- Provides critical reflections by leading scholars of the framework.

About the Editors

Enamul Choudhury is a professor in the School of Public and International Affairs at Wright State University, USA. His teaching areas include courses in the master of public administration program and political science.

Shafiqul Islam is professor of civil and environmental engineering and professor of water diplomacy at the Fletcher School of Law and Diplomacy, Tufts University, USA. Director of the Water Diplomacy Program, Islam works on availability, access and allocation of water within the context of climate challenges, health and diplomacy.
