Exclusive: WORLD

“Over the coming years we will experience the greatest generational wealth transfer in US history, at a time when the range of investor options and interests will only widen. Kevin Mirabile has provided an excellent risk-based foundation to these very unique asset classes.” —William J. Kelly, CEO and President, CAIA Association

“Kevin Mirabile provides unique insights into exotic alternative investments based on his extensive work experience as well as deep academic understanding of these strategies’ sources of risk and return. This book is a must read for those investing in exotic alternatives.”—Steve Turi, Chief Investment Officer and Managing Partner, SkyView Investment Advisors, LLC

“The exotic alternative markets Kevin describes reminds me of the hedge fund industry 25 years ago—niche strategies run by a small group of domain experts. If you want to participate in these opportunities now, this book is an exceptional starting point. The perfect investment book—Kevin explains why these new opportunities exist, who is exploiting them now, what could go wrong and how you can get involved. —Kevin Coldiron, Finance Lecturer, Haas School of Business, U.C. Berkeley

“Kevin Mirabile offers an accessible primer demystifying a set of alternative investments once thought of as esoteric and available only to the most sophisticated investors. He succinctly describes the opportunities and risks associated with them and, importantly, offers practical examples of how they can diversify and improve investor portfolio performance.” —David F. McCarthy, Principal, D.F. McCarthy LLC

This book evaluates new opportunities such as life settlements, litigation funding, farmlands, royalties, weather derivatives, collectables and other unique asset classes. It provides an in-depth analysis of the returns, risks, opportunities and portfolio effects for investors, advisors and academics and anyone who wants to expand their investment horizons.

About the Author

Kevin R. Mirabile is a clinical associate professor of finance at Fordham University where he teaches courses on the principles of finance, investment analysis, derivatives and alternative investing. He has authored articles and books on hedge funds and alternative investments.
