Argues for the continued necessity to ground development studies in a critical political economy approach informed by the contributions of Ashwani Saith

"A festschrift in honour of Ashwani Saith, *Reclaiming Development Studies: Essays for Ashwani Saith* is a scholarly critique of the current state of development studies, its underlying tensions, and its contradictions. Rebutting dominant approaches, the book offers a stimulating study of development as an enduring societal aspiration requiring a truly interdisciplinary method of study, in the tradition of Saith's wide-ranging, articulate and incisive contributions to the subject." — Sukti Dasgupta, Chief, Employment, Labour Markets and Youth Branch, ILO, Geneva.

"An extraordinarily important volume that asserts that real human development can be conceived and achieved - through a deep and careful analysis of the structural causes of poverty, inequalities and climate change in the countries of the Global South. Goes a long way towards reconstructing an analytical center for the field of development studies that has been riven by scientism on one side, and a deep skepticism of the very idea and process of development on the other." — Vamsi Vakulabharanam, Co-director, Asian Political Economy Program (PERI), and Department of Economics, University of Massachusetts Amherst, US

"In explorations traversing the wide terrain of development studies, the essays in this volume celebrating the work of a leading scholar of development trajectories, are valuable contributions that survey, critique and take forward debates on the diverse issues the discipline covers." — C. P. Chandrasekhar, economist and columnist

As the mission, relevance and intellectual orientation of development studies is increasingly being challenged, this collection of essays argues for the continued necessity to ground the field in a critical political economy approach informed by the contributions of Ashwani Saith.

About the Editors

Murat Arsel is Professor of Political Economy of Sustainable Development at the International Institute of Social Studies, Erasmus University, Rotterdam.

Anirban Dasgupta is Associate Professor of Economics at South Asian University, New Delhi.

Servaas Storm is Senior Lecturer in Economics at TU Delft.
