**RIGHTS**

**Exclusive:** WORLD

#### A new paradigm that synthesizes existing social science theories

“New knowledge can create but it also disrupts, argues Hage in this captivating deep-dive into the complexities of knowledge, human development and social evolution. Drawing on his massive experience, masterful knowledge of the literature and extensive conceptual acumen, Hage charts how we can address contemporary dilemmas of knowledge and reflects on strategies for integrating knowledge into models of individual, organizational, societal and economic development.” —Philip Shapira, Professor of Innovation Management and Policy, University of Manchester, UK, and Director, Georgia Tech Program in Science, Georgia Institute of Technology, USA

“Knowledge Evolution and Societal Transformations by Jerald Hage is a truly original masterpiece that provides an interesting and stimulating reading for scholars of the evolution of knowledge and its societal outcomes. The book is an intellectual tour de force of a new paradigm that incorporates micro and macro approaches and offers three analytical levels.” —Amalya L. Oliver, George S. Wise Chair in Sociology, Chair, The Hoffman Leadership and Responsibility Program, Department of Sociology and Anthropology, Hebrew University of Jerusalem

*Knowledge Evolution and Societal Transformation* proposes a new paradigm based on the evolution of knowledge that synthesizes existing social science theories at three analytical levels. A central theme is how knowledge causes new problems and explains growing inequality. To solve these problems, systemic networks in education, economy, and political system are suggested.

#### About the Author

Jerald Hage has spent his professional life combining theory and research to solve individual, organizational, and societal problems. He has published 17 books and over 100 articles on the themes of organizational innovation, science and technology, post-industrial lives, the active state, and systemic coordinated networks. He has also taught and consulted in a number of countries.
