**Exclusive:** WORLD

A significant and timely contribution to the question of what Wittgenstein's philosophy can offer to the ever-growing field of AI

Wittgenstein and AI (Volume II): Value and Governance. This is the second of two edited collections, exploring Wittgensteinian themes in AI. The issues covered by the various chapters of this volume range over a number of topics, with a specific focus on ethics, governance, aesthetics and the law.

#### Readership

The topics addressed by contributors will be of interest to philosophically-minded academics working on AI across a range of disciplines including in computer science, software engineering, and law. Philosophers with an interest in Wittgenstein will also find much value in the connections made with recent developments in artificial intelligence. Finally, Wittgenstein has a broad appeal beyond academia, and the chapters of the two volumes raise issues which will be of interest to AI industry practitioners as well as policy makers.

#### About the Author(s) / Editor(s)

**Alice Helliwell** is Assistant Professor in Philosophy at Northeastern University London. Her research is focused on computational creativity and AI art, including questions of aesthetics and ethics.

**Alessandro Rossi** is Assistant Professor in Philosophy at Northeastern University London. His work focuses on logic, metaphysics and the areas in which they intersect.

**Brian Ball** is Associate Professor in Philosophy at Northeastern University London. His research spans a range of areas, notably the philosophy of mind, language and artificial intelligence, and he has taught the early history of analytic philosophy, including Wittgenstein.
