RIGHTS

Exclusive: WORLD

Explores the 1919 Cannes Medical Conference's pivotal role in transforming the Red Cross movement's activities from war-related work to peacetime humanitarian and public health initiatives, highlighting the conference's significant yet largely undocumented legacy.

This book explores the Cannes Medical Conference of April 1919 and its long-lasting impacts in the humanitarian space. In the aftermath of the First World War, as the world order was being redesigned, this conference served to shift the Red Cross movement towards peacetime and public health work.

Readership

The book targets both an academic and a professional audience, together with a third, more general readership among those interested in the history of the Red Cross movement and in humanitarianism.

The primary market for this book is an academic readership, made up of the large community of scholars interested in the study of non-governmental organisation, humanitarianism and public health. The secondary market for this book is the wide audience of professionals and volunteers who are members of the Red Cross.

About the Author(s) / Editor(s)

Dr. Romain Fathi is Senior Lecturer at the School of History at The Australian National University and an Affiliated Researcher to the Centre for History of Sciences Po (CHSP).
