**Introduces key issues in environmental law, policy, economics, and science, focusing on the roles of various governmental bodies in addressing pollution, greenhouse gasses, environmental protection, and sustainability**

This textbook is designed to introduce the reader to important and emerging issues in contemporary environmental law, policy, and economics, and environmental science. It addresses both classical chemical pollutants and greenhouse gases, explains the major environmental law statutes.

#### Key selling points

- Covers both classical chemical pollutants and greenhouse gases
- Addresses both environmental law and environmental economics and their impact on environmental policy
- Includes tutorials on the conventional toxicology of toxic substances as well as on endocrine disruption, epigenetic effects, toxicant loss of tolerance, and the mechanics of human-induced climate change
- Explores alternative approaches—beyond regulation—to reduce pollution and combat global climate change

#### About the Author(s) / Editor(s)

**Nicholas A. Ashford** holds a PhD in chemistry and a law degree from the University of Chicago, where he also received graduate training in economics. He is professor of technology and policy in the School of Engineering at the Massachusetts Institute of Technology.

**Charles C. Caldart** holds a law degree from the University of Washington and a master's degree in public health from Harvard University. He is a lecturer in civil and environmental engineering at the Massachusetts Institute of Technology and the litigation director of the National Environmental Law Center in Boston and Seattle.
