

Reclaiming Nature

Environmental Justice and Ecological Restoration

Edited by James K. Boyce, Sunita Narain, and Elizabeth A. Stanton

Pub Date: March 2007

Binding: Hardback

Price: £50 / \$80

ISBN: 9781843312352

Category: BUSINESS & ECONOMICS /
Development / General

BISAC code: BUS092000

BIC code: RNK

Extent: 439 pages

Size: 234 x 153mm; 9.2 x 6

Illustrations: 40+ figures, tables and photographs

Rights Held: World

Description

Explores the relationship between the environment, human activity and social justice.

'A refreshing liberation from the alluring half-truths of conventional economics and public policy.' —*David Bollier, Editor, OntheCommons.org and author of Silent Theft: The Private Plunder of Our Common Wealth*

In **Reclaiming Nature**, leading environmental thinkers from across the globe explore the relationship between human activities and the natural world. The authors draw inspiration and lessons from diverse experiences ranging from community-based fishery and forestry management to innovative strategies for combating global warming. They advance a compelling new vision of environmentalism, founded on the link between the struggle to reclaim nature and the struggle for social justice. This book advances three core propositions: first, humans can and do have positive as well as negative effects on the natural environment. By restoring degraded ecosystems and engaging in co-evolutionary processes, people can add value to nature's wealth. Second, every person has an inalienable right to clean air, clean water, and a healthy environment. These are not privileges to be awarded on the basis of political power, nor commodities to be allocated on the basis of purchasing power -- they are fundamental human rights. Third, low-income communities are not the root of the problem. Rather they are the heart of the solution. In cities and the countryside across the world, ordinary people are forging a vibrant new environmentalism that is rooted in the defense of their lives and livelihoods.

Readership: Essential reading for students and lecturers concerned with the study of the environment.

Contents

List of Figures and Tables; Acknowledgements; Introduction; Part I. Adding Value; Part II. Democratizing Access; Part III. Capturing Benefits; Part IV. Defending the Commons; About the Contributors; Index

About the Editors

James K. Boyce directs the Political Economy Research Institute's Program on Development, Peacebuilding, and the Environment.

Sunita Narain is currently director of the Centre for Science and Environment and publisher of the fortnightly magazine *Down to Earth*.

Elizabeth A. Stanton is a Lecturer in Economics at the University of Massachusetts, Amherst.
